Pro tip from the chef

Season a little stronger than usual — prepped food loses aroma after 1–2 days.
Add fresh accents like lemon and herbs right before serving.

The 8 most common beginner mistakes (and how to avoid them)

- Too much at once — start with 3–4 meals instead of 15.
- The same box seven days — vary sauces and spices.
- Sealing while warm — condensation shortens shelf life.
- Mixing delicate with sturdy — add salad and crunch when serving.
- Shopping without a list — impulse buys break the budget.
- Underseasoning — season boldly, add fresh accents last.
- Wrong container sizes — uniform sizes portion correctly by default.
- Treating Sunday as sacred — even 20 minutes any evening saves the next day.
